Molecular and Cellular Biochemisty **159**: 171–173, 1996.

Index to Volume 159

Agrawal DK *see* Chisholm LJ *et al.*
Al-Jafari AA, *see* Kamal MA *et al.*
Angelova K, Fralish GB, Puett D and Narayan P: Identification of conventional and novel endothelin receptors in sheep choroid plexus cells 65–72
Anogianakis G, *see* Reale M *et al.*
Antón A, *see* Portolés MT *et al.*

Barbacane RC, *see* Reale M *et al.*
Bernardo NL, *see* Yoshida K-i *et al.*
Brenner RR, *see* Ves-Losada A.
Brooks SPJ and Lampi BJ: Enzymes of carbohydrate metabolism in young and adult rats fed diets differing in fat and carbohydrate 55–63

Carvalho-Alves PC, *see* Castilho RF *et al.*
Castilho RF, Carvalho-Alves PC, Vercesi AE and Ferreira ST: Oxidative damage to sarcoplasmic reticulum Ca^{2+}-pump induced by Fe^{2+}/H_2O_2/ascorbate is not mediated by lipid peroxidation or thiol oxidation and leads to protein fragmentation 105–114
Catalá M, *see* Portolés MT *et al.*
Chakraborti T, *see* Roychoudhury S *et al.*
Chakraborti S, *see* Roychoudhyry S *et al.*
Chisholm LJ, Agrawal DK, Pearson TJ and Edwards JD: Endothelin-1 induces tyrosine phosphorylation in human blood monocytes 33–38
Chong CH, *see* Zhang J-T
Conti P, *see* Reale M *et al.*

De Fazio P, *see* Reale M *et al.*
Desnoyers S, Kirkland JB, Poirier GG: Association of poly(ADP-ribose) polymerase with nuclear subfractions catalyzed with sodium tetrathionate and hydrogene peroxide crosslinks 155–161
Devamanoharan PS and Varma SD: Studies of L-threose as substrate for aldose reductase: A possible role in preventing protein glycation 123–127
Dhawan V, *see* Kaul D *et al.*
Di Febbo C, *see* Reale M *et al.*
Dimitriadou D, *see* Reale M *et al.*
Doetschman T, *see* Fontaine RN *et al.*
Doloresco M, *see* Yoshida K-i *et al.*
Duda T, *see* Venkataraman V *et al.*
Edwards JD *see* Chisholm LJ *et al.*

Elliot GT, *see* Yoshida K-i *et al.*

Ferreira ST, *see* Castilho RF *et al.*

Fontaine RN, Gossett RE, Schroeder F, O'Toole BA, Doetschman T and Kier AB: Liver and intestinal fatty acid binding proteins in control and TGFβ1 gene targeted deficient mice 149–153
Fralish GB, *see* Angelova K *et al.*
Frydas S, *see* Reale M *et al.*

Galoian K, *see* Venkataraman V *et al.*
Ghosh SK, *see* Roychoudhury S *et al.*
Gosset RE, *see* Fontaine RN *et al.*

Hatch GM: Regulation of cardiolipin biosynthesis in the heart 139–148

Kamal MA, Nasim FH and Al-Jafari AA: *In vitro* inhibition of human erythrocyte acetylcholinesterase (EC 3.1.1.7) by an antineoplastic drug methotrexate 47–53
Kaul D, Dhawan V and Kaur M: Evidence and nature of a novel thiol-oxidase in human platelets 81–84
Kaur M, *see* Kaul D *et al.*
Kier AB, *see* Fontaine RN *et al.*
Kirkland JB, *see* Desnoyers S *et al.*
Kukreja RC, *see* Yoshida K-i *et al.*

Lampi BJ, *see* Brooks SPJ
Londraville RL, Storch J and Sidell BD: Binding site polarity and ligand affinity of homologous fatty acid-binding proteins from animals with different body temperatures 39–45

Maaieh MM, *see* Yoshida K-i *et al.*
Moss J, *see* Price SR *et al.*

Narayan P, *see* Angelova K *et al.*
Nasim FH, *see* Kamal MA *et al.*
Nightingale MS, *see* Price SR *et al.*
Nirmala C and Puvanakrishnan R: Protective role of curcumin against isoproterenol induced myocardial infarction in rats 85–93

O'Toole BA, *see* Fontaine RN *et al.*

Pagani R, *see* Portolés MT *et al.*
Pearson T *see* Chisholm LJ *et al.*
Placido FC, *see* Reale M *et al.*
Poirier GG, *see* Desnoyers S *et al.*
Porreca E, *see* Reale M *et al.*
Portolés MT, Catalá M, Antón A and Pagani R: Hepatic response to the oxidative stress induced by *E. coli* endotoxin: Glutathione as an index of the acute phase during the endotoxic shock 115–121
Price SR, Nightingale MS, Tsuchiya M, Moss J and Vaughan M: Interspecies relationships among ADP-ribosylation factors (ARFs): Evidence of evolutionary pressure to maintain individual identities 15–23
Puett D, *see* Angelova K *et al.*
Puvanakrishnan R, *see* Nirmala C

Qian Y-Z, *see* Yoshida K-i *et al.*

Reale M, Barbacane RC, Frydas S, Anogianakis G, Trakatellis A, Dimitriadou D, Vacalis D, Placido FC, De Fazio P, Porreca E, Di Febbo C and Conti P: Human recombinant interleukin-1β induces thromboxane A_2 release in polymorphonuclear leukocytes, macrophages and platelets: Effect of IL-1 receptor antagonist 163–168

Roychoudhury S, Ghosh SK, Chakraborti T and Chakraborti S: Role of hydroxyl radical in the oxidant H_2O_2-mediated Ca^{2+} release from pulmonary smooth muscle mitochondria 95–103

Schroeder F, *see* Fontaine RN *et al.*
Sharma RK, *see* Venkataraman V *et al.*
Shipley JB, *see* Yoshida K-i *et al.*
Sidell BD, *see* Londraville RL *et al.*
Skjelbakken T, *see* Valen G *et al.*
Storch J, *see* Londraville RL *et al.*

Trakatellis A, *see* Reale M *et al.*
Tsuchiya M, *see* Price SR *et al.*

Vaage J, *see* Valen, G *et al.*
Vacalis D, *see* Reale M *et al.*
Valen G, Skjelbakken T and Vaage J: The role of nitric oxide in the cardiac effects of hydrogen peroxide 7–14
Varma SD, *see* Devarmanoharan PS
Vaughan M, *see* Price SR *et al.*
Venkataraman V, Duda T, Galoian K and Sharma RK: Molecular and pharmacological identify of the α_{2D}-adrenergic receptor subtype in bovine retina and its photoreceptors 129–138
Vercesi AE, *see* Castilho RF *et al.*
Ves-Losada A and Brenner RR: Long-chain fatty Acyl-CoA synthetase enzymatic activity in rat liver cell nuclei 1–6

Yoshida K-i, Maaieh MM, Shipley JB, Doloresco M, Bernardo NL, Qian Y-Z, Elliot GT and Kukreja RC: Monosphoryl lipid A induces pharmacologic 'preconditioning' in rabbit hearts without concominant expression of 70-kDa heat shock protein (corrected article **156**: 1–8, 1996) 73–80

Zhang J-T and Chong CH: Co-translational effects of temperature on membrane insertion and orientation of P-glycoprotein sequences 25–31
